STI trailers offer numerous safety and environmental features.

Fort Wayne, Indiana. – STI continues to focus on the environment. The new one hundred new fifty-three foot flat floor trailers that STI is taking delivery of are equipped with state-of-the-art safety and environmental features.

These features include:

- Automatic tire inflation which allows for proper air pressure, increase tire wear, saves on road service repairs
- STI designed safety decals and side marker lights designed to inform the public of intention to make right turns
- Equipped with LED lights that are brighter with increased distance visibility, lower voltage demand, decreased failure frequency at a lower cost
- Vantraax Surelok suspension eliminates dock movement forward and down, locks brakes while loading and unloading. This hub sealed assembly reduces wheel end assembly failure and separation. Quik-Draw Slider is fully-pneumatic and the pin-pull mechanism operates with a simple pull of a valve.
- For driver safety each trailer has been installed with a grab bar on left door and rear steps are integrated into the rear bumper

In addition, STI launched new fleet management technologies for trailer tracking which enhances driver productivity eliminates searching for trailers and increases equipment utilization while providing real time benchmarking tools. The street level mapping with enhanced photography will allow customers to know in real time the exact location of the trailer and their shipments.

STI is a Fort Wayne, Indiana, specialized transportation company and a leader in providing quality services for products requiring special handling, specialized equipment, on-site services and transportation. The company services both less-than-truckload and truckload shipments throughout the United States and Canada. Service offerings include specialized transportation, residential delivery, final mile delivery, transportation management, and warehousing.
